

# FV FLICKA

## Vessel Specifications

### Before Trawler Dimensions

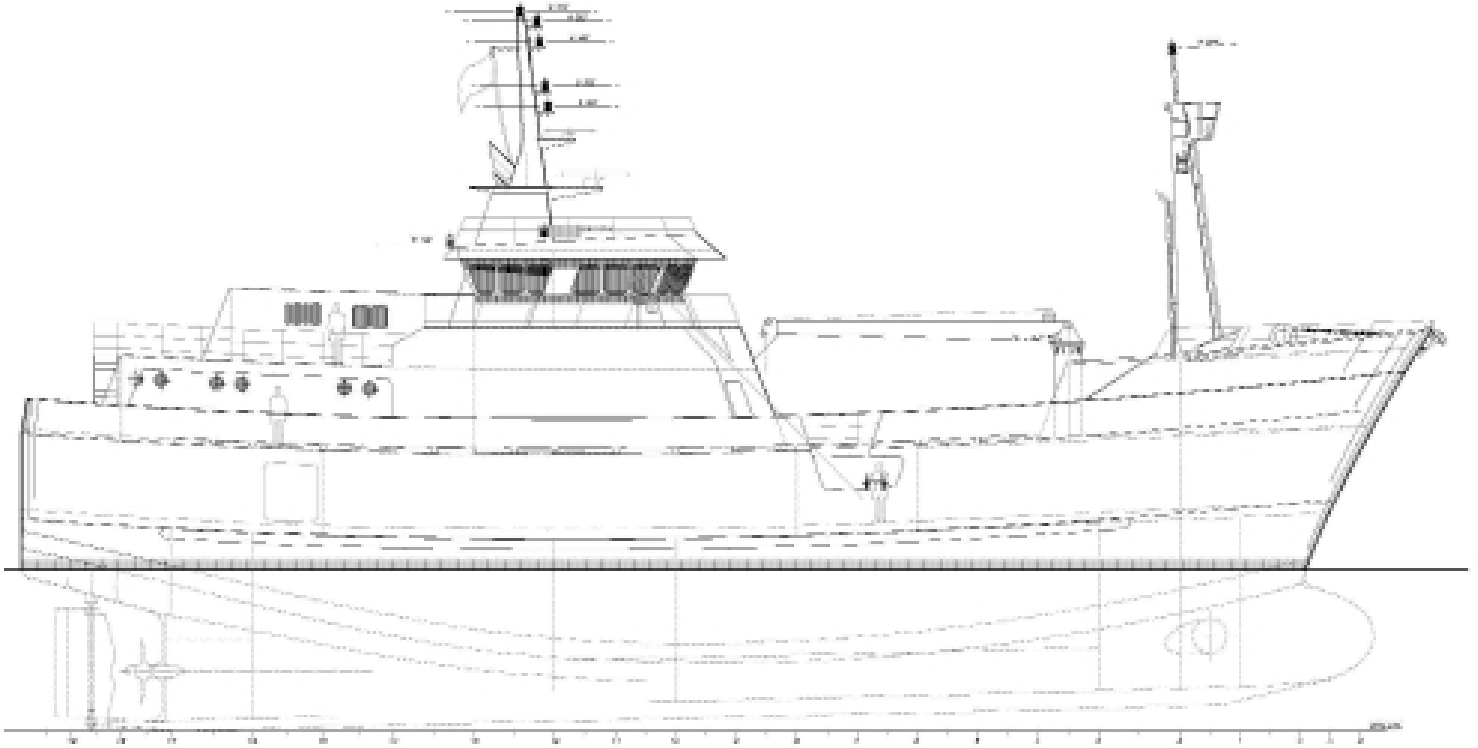

Overall Length	140'-0"
Breadth	34'-0"
Depth	16'-0"
Propulsion	Conventional
Fuel Oil	40,533 gal
Fresh Water	2,725 gal
Fish Hold Capacity	10,230 cu ft

### After Longliner Dimensions

Overall Length	140'-0"
Breadth	34'-0"
Depth	16'-0"
Propulsion	Conventional
Fuel Oil	49,285 gal
Fresh Water	8,115 gal
Fish Hold Capacity	14,810 cu ft

## FV FLICKA

---

The Jensen team provided a functional design package for the conversion of the FV FLICKA from a trawler to a RINA-classed longline fishing vessel. As part of the conversion, the vessel's RSW tanks were converted into longline magazine storage, fish hold volume, and additional fuel. The trawl winches and A-frame were removed to make room for an extension of the deckhouse on the focsle deck and a new deckhouse providing lodging for 11 additional crew. To accommodate for crew comfort, a new wet room and six additional heads were added. The vessel was completely repowered to align with the new intended operations for increased fuel efficiency. All work was completed while maintaining the vessel's U.S. Regulatory tonnage below 200 tons.
